The Poorest Place to Tell a Lie!

IT has been said by some of our radical reformers that advertising misleads the public.

Such accusations fall under their own weight.

The poorest place in the world to attempt a lie is in the advertising columns of American newspapers and magazines, and in American radio programs.

In the first place, our publishers and broadcasting companies wouldn't carry dishonest advertising. They outlawed it long ago.

In the second place, such efforts to mislead would be conducted in full view of the public and of the officials empowered to apply fraud laws.

In the third place, dishonest advertising is as inefficient as dirty football. It does not pay.

Informed people have lost interest in the advertising-baiting books and speeches of the radical self-appointed reformers since one after another of them has figured prominently before the House Special Committee on un-American Activities.

Idaho Police Chase Weaving Truck; Find Collie at Wheel

IDAHO FALLS, IDA.—Two officers, William Naef and Ray Jones, pursued a truck they saw weaving down the highway. It was quite a job to get the driver to stop.

Ready for a drunk driver, an argumentative driver, a sleeping driver, an inexperienced driver, or almost any other kind, they still weren't ready for what they found when they pulled the truck door open—a collie dog on the driver's seat, his paws on the wheel.

The vehicle had no other occupants.

Some time later, after a search of the neighborhood, the officers solved the mystery. Two youngsters admitted they had taken the truck for a spin, saw the officers coming and jumped out, leaving their dog to do the driving.

Texans Plan to Construct World's Tallest Building

HOUSTON, TEX. — Houston may be on its way to boasting the world's tallest building, taller by 131 feet than New York's Empire State building.

Plans are being considered by the United Building Supply Company, for erecting a 140-story structure, says Murel Goodell, general manager.

The out-scrapingest skyscraper of them all would cost "in the neighborhood of 25 million dollars," Goodell said.

Floor space, Goodell said, would be about 1,500,000 square feet. The building would stand one foot taller than the unfinished Palace of the Soviets in Moscow.

Uncle Sam Says

You do not need to be a crystal ball exeer to figure out the truth of the saying that the future holds for you what you hold for the future.

If you look into your present you'll find the answer to how much security you can count upon for yourself and your family. Are you bringing home early? Millions of my nieces and nephews know that these bonds are among the most essential assets to hold for their future because savings bonds are safe and profitable.

I'm not telling you again how important ... Fight to vote is in this ... And it's a right we can ... only by exercising it! ... the other individual liber... ties—from freedom to enjoy ... glass of beer or ale, to a woman's right to vote along with men.

Folks can thank *themselves* that on summer evenings they'll be able to listen to band concerts in a well-kept park . . . enjoying a bottle of beer or soda pop (whichever they prefer). Because from where I sit, that's a freedom they've *earned* by exercising a still more important freedom: Voting!
